Simple Guidelines to Follow

Tell Your Story in Pictures	Tell Your Story with Video	Tell Your Story in Print
Get creative!	Get creative!	Get creative!
Cell phone cameras are fine; other cameras are generally better. Your call—whichever is most convenient. The higher the resolution the better!	Cell phone cameras are fine; other cameras are generally better. Your call—whichever is most convenient. Max length: 90 seconds	Send your story or message via email (embedded or attached). Max length: 250 words
Use the PHOTOGRAPHY CONSENT FORM! Print as many copies as you need and have everyone in your photos sign a form. Be sure to sign one yourself! (NOTE: Unfortunately, WVANA will not be able to use photos received without signed consent forms.)	Use the <u>VIDEO CONSENT FORM!</u> Print as many copies as you need and have everyone in your video sign a form. Be sure to sign one yourself! (NOTE: Unfortunately, WVANA will not be able to use videos received without signed consent forms.)	No consent form necessary. WVANA reserves the right to edit as necessary for length or patient privacy.
Personality shots are fun to take!	Talking head videos are fun to make!	Bring your story to life in words!
Take a posed photo by your anesthesia machine, supply cart, in the OR, with your healthcare colleagues, or even with a consenting patient (remember the consent form!). **Reminders** Give some thought to your photos before you snap away. Ask yourself: Will people viewing the photos know I'm a CRNA, or will I look like any other healthcare provider wearing scrubs? Selfies are great, but maybe not the best option for this initiative. If you go the selfie route, make sure there's a lot more of interest in the photo than just you in close-up.	Make your video by your anesthesia machine, supply cart, in the OR, with healthcare colleagues, or even with a consenting patient (remember the consent form!). **Reminders** Give some thought to your video. Make sure your visual/verbal message is compelling and makes clear who you are and what you do. What can you show/say that will be of keen interest to your audience? Selfie videos are not recommended.	Share your first-person account of why you entered the field, what's most satisfying about providing patient care, a life-changing moment for you or a patient, a profound experience with the patient care team, mentoring or being mentored, why you believe CRNAs are crucial to the future of healthcarethe sky's the limit with the written word!
Clinical shots are preferred!	Clinical videos are powerful!	See above
Unposed photos that show you "in action" are the best way to educate the public about CRNAs. Staged "action shots" are fine, too, so long as the results don't look hokey. You will need to enlist someone to take the photos of you—a colleague, your facility's PR department, etc. Reminders Get the necessary permissions from your department, facility, other entity. Whenever possible, avoid capturing patients' faces in photos during procedures (even with signed consent forms). It's easier than you think! Capture easily recognizable actions such as squeezing the bag, placing a mask, checking a monitor, drawing up medications, etc., that virtually shout "anesthesia care." (Of course, capturing more unique procedures is great, too!) Avoid gore or disturbing images in your photos. As always, follow practice standards and guidelines carefully (proper use of masks, caps, gloves, etc.).	with signed consent forms). It's easier than you think!
